Saudi Arabia Rebar Market

- According to its Vision 2030, the Kingdom wants to establish itself as a major international centre for logistics and investment.
- The development program has opened doors in a number of brand-new industries, including clean energy, tourism, and smart cities, with giga projects strategically placed all around the country.
- On the other side, the Economic Cities Authority has been established to reinvigorate investor interest in previous economic city initiatives in the Kingdom that attempt to address particular socioeconomic concerns including the lack of affordable housing and effective transportation, among others.

Business Proposal

- The proposal is for setting up a steel & general trading business in Saudi Arabia with a business group based in Saudi Arabia having vast experience in G2G and B2B deals.
- This proposal is aimed at attracting investments from strategic investors / investors focused on steel trading business.
- The proposed trading house will cater to steel requirement's of the infrastructure / construction businesses under the Vision 2030 program.

Market Opportunity
